We offer three premium IML surface finishes. Each engineered to elevate shelf presence while delivering the durability and performance your packaging demands:

Matte Finish

A smooth, nonreflective surface that conveys sophistication and a modern aesthetic. Matte IML labels reduce glare under retail lighting, offer a soft touch visual appeal, and are ideal for premium food, dairy, and clean label brands seeking a refined look.

Glossy (High-Glaze) Finish

A vibrant, high shine surface that enhances color depth and sharp graphic detail. Glossy IML labels maximize visual impact on shelf, making them perfect for bold branding, high contrast designs, and products that rely on strong visual appeal.

Foil / Metallic Finish

A striking, reflective surface that delivers a premium, upscale presence. Foil IML labels create eye catching metallic accents such as gold, silver, or other custom tones. Ideal for specialty, limited edition, or luxury packaging applications.

Each finish is fully integrated into the container during the molding process, ensuring exceptional durability, moisture resistance, and long lasting brand integrity.
